

CS 305
Design and Analysis of Algorithms

09 / 27 / 2021

Instructor: Michael Eckmann

Today's Topics

- Questions / Comments?
- Quicksort
 - Divide and conquer
 - Partitioning
 - Best case analysis
 - Worst case analysis
 - Randomized algorithm
- Probability
 - Sample space
 - Event
 - Elementary event

Quicksort / Partition examples

- MergeSort space requirement: $\text{BigTheta}(n)$
- Quicksort is a divide and conquer algorithm that works in-place (that is, with space $\text{BigTheta}(1)$)
- Example on the board of Partition function
